

Running a java program

1. Create a java file .java extension

```
File Edit Format View Help
public class Demo{

    public static void main(String[] args){

        System.out.println("This is first assignment");

    }

}
```

2. In command prompt run the following commands:
 - a. Javac Demo.java
 - b. Java Demo

```
C:\Users\srajan\Downloads>javac Demo.java

C:\Users\srajan\Downloads>java Demo
This is first assignment

C:\Users\srajan\Downloads>_
```
